Senior IT Support Specialist with 5+ years of experience engineering endpoint solutions, managing identity access, and optimizing IT operations across global environments. Expert in administering macOS and Windows endpoints via Jamf Pro, Microsoft Intune (Autopilot), and ManageEngine. Proven track record in executing cloud migrations (PaperCut to Xerox Workplace), streamlining onboarding/offboarding workflows, and delivering white-glove VIP support.

Skills Summary

Endpoint Management: Jamf Pro, Microsoft Intune (Windows Autopilot), ManageEngine Endpoint Central
Identity & Access Management: Active Directory, User Onboarding & Offboarding, RBAC, Domain Access Control
Print & Infrastructure: PaperCut MF, Xerox Workplace Cloud, Print Server Migration, Hardware Procurement
ITSM & Service Operations: Remedy ITSM, Remote Monitoring, Incident Management, Process Automation
Operating Systems & Hardware: macOS, Windows 10/11, Mobile Devices (iOS/Android), Polycom
Collaboration & Security: Vulnerability Remediation, Scripted Patching, White-Glove VIP Support

Work Experience

Transunion

Sr. Analyst, Desktop Support

July 2025 to Present

- Administered and supported the enterprise MacBook environment using Jamf Pro, setting up configuration profiles, security policies, and advanced Tier-3 macOS troubleshooting.
- Packaged, tested, and deployed applications and OS/third-party security patches across Windows and macOS endpoints using Microsoft Intune and ManageEngine Endpoint Central.
- Developed automated scripts and remediation workflows within ManageEngine to proactively resolve recurring technical issues and reduce overall ticket volume.
- Leading the enterprise print migration from PaperCut MF to Xerox Workplace Cloud, modernizing print server infrastructure, secure badge authentication, and pull-printing capabilities across corporate offices globally.
- Managed full-lifecycle iPhone deployments, user support, cellular line assignments, and internal invoice processing for corporate mobile accounts.
- Forecasted regional IT hardware needs and managed vendor relationships for purchasing, order tracking, and invoice payments in alignment with global corporate policies.
- Managed Active Directory infrastructure globally, governing user account creation, security group access requests, and domain management specifically for the Canada region.

IT Analyst, End User Computing

October 2022 to July 2025

- Provided Tier-3 support to 350+ users locally and 13000+ users globally, utilizing data-based practices and effective data management concepts to minimize downtime and ensure seamless business operations.
- Executed the Windows Autopilot and Intune rollout to automate device provisioning and imaging, dramatically lowering IT setup times for new hardware.
- Implemented ManageEngine Endpoint Central to centralize remote monitoring, configuration, and routine device maintenance across all corporate endpoints.
- Collaborated closely with the Information Security team to deploy critical vulnerability patches and run custom remediation scripts across end-user devices.
- Enterprise manager for print servers and PaperCut MF infrastructure; driver pushes and advanced network/hardware printer troubleshooting.
- Delivered technical support for videoconferencing systems and provided white-glove support for VIPs, demonstrating strong communication skills and a clear understanding of complex technical concepts.
- Tracked and managed incidents using Remedy ITSM, analyzed recurring issues and contributed to developing long-term solutions to prevent future occurrences.
- Oversaw IT onboarding, hardware break-fix support, and asset management for PCs and mobile devices, ensuring efficient data evaluation and management.

CORFinancial Corp.

Analyst

May 2020 to September 2020

- Designed and mapped business process workflows to evaluate system performance and streamline technical operations.
- Managed cloud storage environments and user access permissions using Microsoft Azure and SQL, ensuring system security and seamless data integration.
- Utilized advanced Excel data analysis (pivot tables, macros) and Tableau to monitor system performance metrics and operational reporting.
- Collaborated with business stakeholders to resolve technical escalation requests, conduct ad-hoc system analysis, and improve IT reporting workflows.

**KTM Bees
Associate**

March 2018 to November 2019

- Maintained office network infrastructure, endpoint hardware (PCs, laptops, printers), and wireless systems, delivering Tier-1/2 support to minimize downtime.
- Administered user accounts, security groups, and access permissions across Active Directory and SCCM 2012 environments.
- Managed IT asset tracking for hardware, software licenses, and peripheral inventory to maintain compliance and accurate system records.
- Supported end users with Microsoft 365 and office productivity applications, resolving daily technical issues and escalating complex hardware/software incidents.

**Rigo Technologies
Intern**

November 2017 to February 2018

- Developed APIs and utilized modern web frameworks for efficient data transformation and integrations.
- Designed and optimized databases, focusing on table design and data load best practices to ensure data quality and efficiency.
- Collaborated with developers to troubleshoot and resolve software bugs and errors, ensuring data quality and integrity.
- Prepared and submitted reports and documentation to support data analysis and transformation, maintaining a solutions-focused approach.

Education

-
- **Graduate Certificate, Business Management**
Canadore College January 2021 – August 2021
 - **Graduate Certificate, Big Data Analytics**
Georgian College January 2020 – August 2020
 - **Bachelor Of Science (Hons), Computer Science**
London Metropolitan University September 2015 – September 2018
